

Science for Tomorrow's Neurosurgery

Patient & Public Involvement (PPI) group

Do YOU want to be actively involved in making research on Next Generation Neurosurgery more relevant & impactful?

Research scientists from King's College London and King's College Hospital are seeking **Patient and Public Involvement (PPI)** in the development of medical imaging research & technologies

Current Project:

- Development and integration of a new, imaging system to improve neurosurgical outcomes

What is involved?

- 1-2 face-to-face meetings per year
- Your comments and feedback on research
- Being contactable between meetings

What we provide? Travel expense, compensation for your time, childcare/adult support expenses to enable participation, updates on study progress

Please find further information in our Terms of Reference
